

Ready. Aim. Smile!

Getting to Know You

We invite you to have your photo taken during today's visit to your doctor's office. The photo will be included in your secure electronic medical record. This is one of many ways we can become more familiar with you. The better we know you, the more we can help you thrive.

At this time, the photo in your medical record does not take the place of presenting a photo id when you register for care.
