By the numbers

Approximately 400 physicians provide care at the Walnut Creek Medical Center, which offers a range of specialized services such as cosmetic dermatology, chemical dependency, and health education. In 2003, the facility opened a state-of-the-art, 32,000-square-foot Emergency Department—the largest in Contra Costa County. The facility has:

- 233 beds
- 36-bed maternity unit
- 10 high-tech surgical suites
- 52 Emergency Department treatment bays
- Nearby occupational health center

Raising the bar for specialized care

When special medical attention is required, our facilities offer centers where physician specialists focus on a particular area such as spinal surgery or cardiovascular care. Aided by the latest technology and research, these medical teams often break new ground while providing advanced specialty care to our members. Centers at this facility include:

- Comprehensive cancer care
- Intervention services (cardiac catheterization, interventional radiology, and vascular procedures)
- Neonatal intensive care
- Primary stroke care
- Robotic laparoscopic surgery

A leader for emergency services in Northern California

The hospital's state-of-the-art Emergency Department demonstrates a new approach to emergency services. Each of the private 52 rooms includes built-in cardiac and vitals monitoring. Onsite blood-drawing stations and digital imaging are more convenient for members and caregivers. It's also the only department in the region designed to handle mass decontamination from a major chemical disaster or other public health emergency.

Recognized for environmentally friendly practices

Practice Greenhealth, an organization that recognizes health care institutions making a commitment to eco-friendly practices, recently awarded the Partner Recognition Award to the Walnut Creek Medical Center for our efforts to eliminate mercury, prevent pollution, and reduce waste.
